YUNO PARTNERSHIPS · INTERNAL STRATEGY BRIEF · LIVE DATA

80 accounts per PM vs *6–9* per AM. Same company. Different standard.

Yuno's Account Managers earn a new headcount hire for every 6–9 merchant accounts. Our Partnership Managers carry up to 84 accounts each — with APAC uncovered, a backfill joining in one month, ~22 Central America accounts moving to Tali and Jo, and 34 accounts currently unassigned. Partners are Yuno's multiplier layer. We need to treat them that way.

01 — THE CORE IMBALANCE

✦ ACCOUNT MANAGERS — YUNO

6–9 merchants

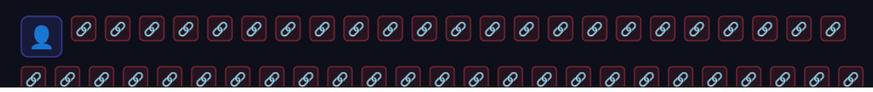
Every 6–9 merchants, Yuno hires a new AM. Each merchant gets deep, proactive, relationship-first management. This is Yuno's own published standard for high-touch account coverage.

vs

⚠ PARTNERSHIP MANAGERS — YUNO

~80 accounts

Each PM carries ~80 partner accounts covering multiple regions, languages, and regulatory frameworks. Partners — who multiply Yuno's reach to thousands of merchants — receive a fraction of the attention merchants get.



✓ At 6–9 accounts: QBRs happen, upsell is proactive, issues resolve fast. Each merchant feels like a priority.

✗ At 80 accounts: reviews are skipped, expansion signals go unseen, partners feel like a number. Yuno's biggest growth lever is being left unmanaged.

02 — YOUR TEAM RIGHT NOW · REAL NUMBERS

4 active PMs. 1 backfill joining in ~1 month. APAC uncovered. 451 total accounts.

This is the Yuno partnerships team as it stands today. Tali, Jo, Ale and Fran are exceptional — but each is doing the work of 8–10 people by Yuno's own AM benchmark. A backfill for Mari joins in ~1 month and takes over her full portfolio, except ~22 Central America accounts which transfer to Tali and Jo now. Franklin's 60 APAC accounts + 34 unassigned remain with no owner.

Tali
PARTNERSHIP MANAGER · LATAM LEAD

🌎 LATAM · Brasil · Global · C.America
+~11 C.America accounts transferring from Mari now

80 → ~91
ACCOUNTS (+~11 C.AMERICA FROM MARI)

Overloaded — ~91 once C.America transfers

50
ACCOUNTS + GLOBAL OVERFLOW INCOMING

Overloaded — vs 6–9 AM standard

10 strategic · 17 AM · 33 BD

Franklin — Departed · Not backfilling
WAS: APAC PARTNERSHIP MANAGER

60
ACCOUNTS NOW UNMANAGED

All 60 APAC accounts (Japan, India, Indonesia, Australia, SEA, Korea, Taiwan...) + 34 unassigned APAC accounts → need Head of APAC. Total: **~94 APAC accounts with no owner**.

Mari — Departed · Backfill joining ~1 month
WAS: STRATEGIC GLOBAL PM

78
ACCOUNTS

Backfill inherits Mari's full portfolio (NA, Global, Strategic) when they join in ~1 month.

~22 Central America accounts transfer to Tali & Jo now (split ~11 each) — these do not go to the backfill.

34 Unassigned
NO OWNER · FALLING THROUGH THE GAPS

Spans LATAM, Global, APAC, North America, Brasil — accounts with no active PM assigned.

These 34 accounts are receiving zero proactive management. Some will be in-flight deals, others live agreements silently at risk.

?

🚨 **Head of APAC — Not Yet Hired**

CRITICAL VACANCY

🌏 AU · SG · JP · IN · SEA · HK · Korea · Taiwan · China

~94

ACCOUNTS WAITING — FRANKLIN'S 60 + 34 UNASSIGNED APAC

APAC is the world's largest payments market. Every month without this hire is 94 partner relationships with no owner, no review, no growth plan.

↑

Mari Backfill

JOINING IN ~1 MONTH · STRATEGIC GLOBAL PM

🌎🌍🌐 NA · Global · Strategic

Inherits Mari's full portfolio — USA, Canada, Mexico, Global strategic

~56

ACCOUNTS AT START (MARI'S BOOK MINUS C.AMERICA)

Inherits JP Morgan, Elavon, PayPal, Mastercard, Stripe, Nuvei USA, Bank of America and all of Mari's NA + Global strategic relationships. C.America already transferred to Tali & Jo.

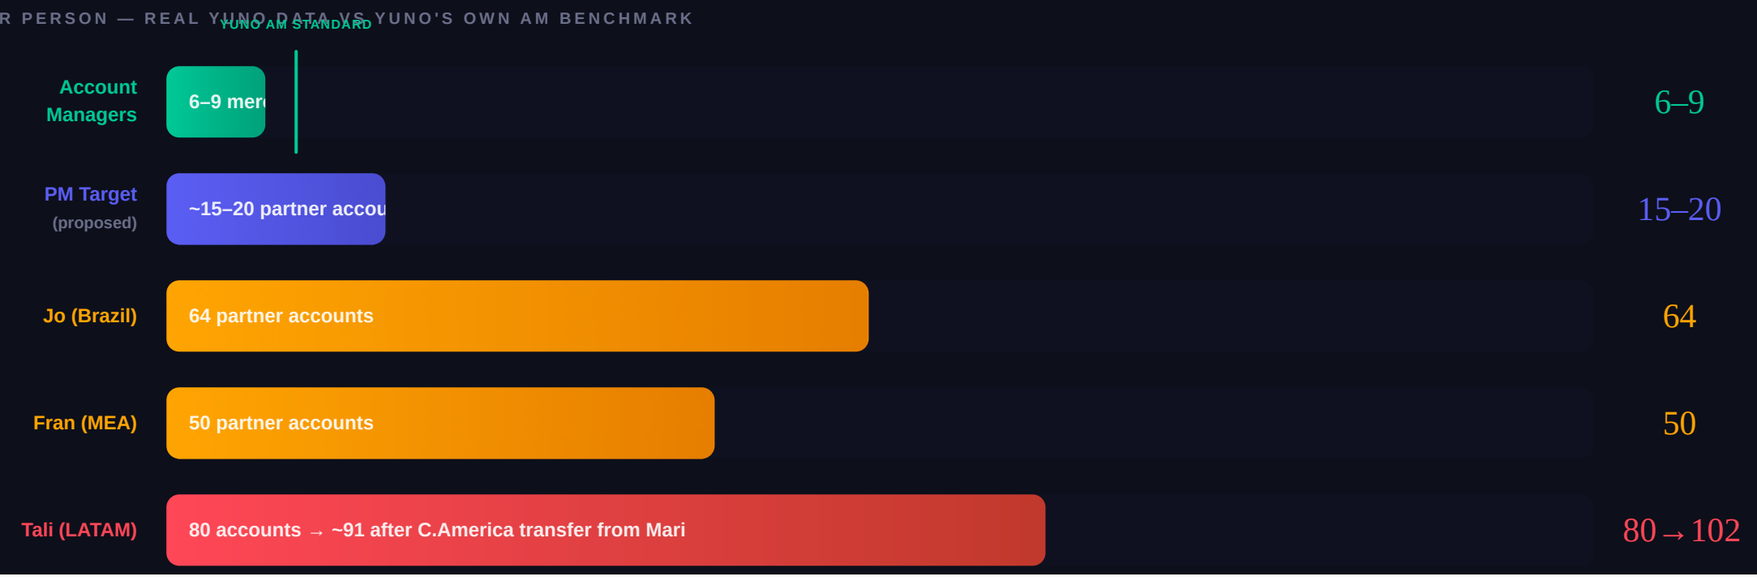
PMS NEEDED AT AM RATIO

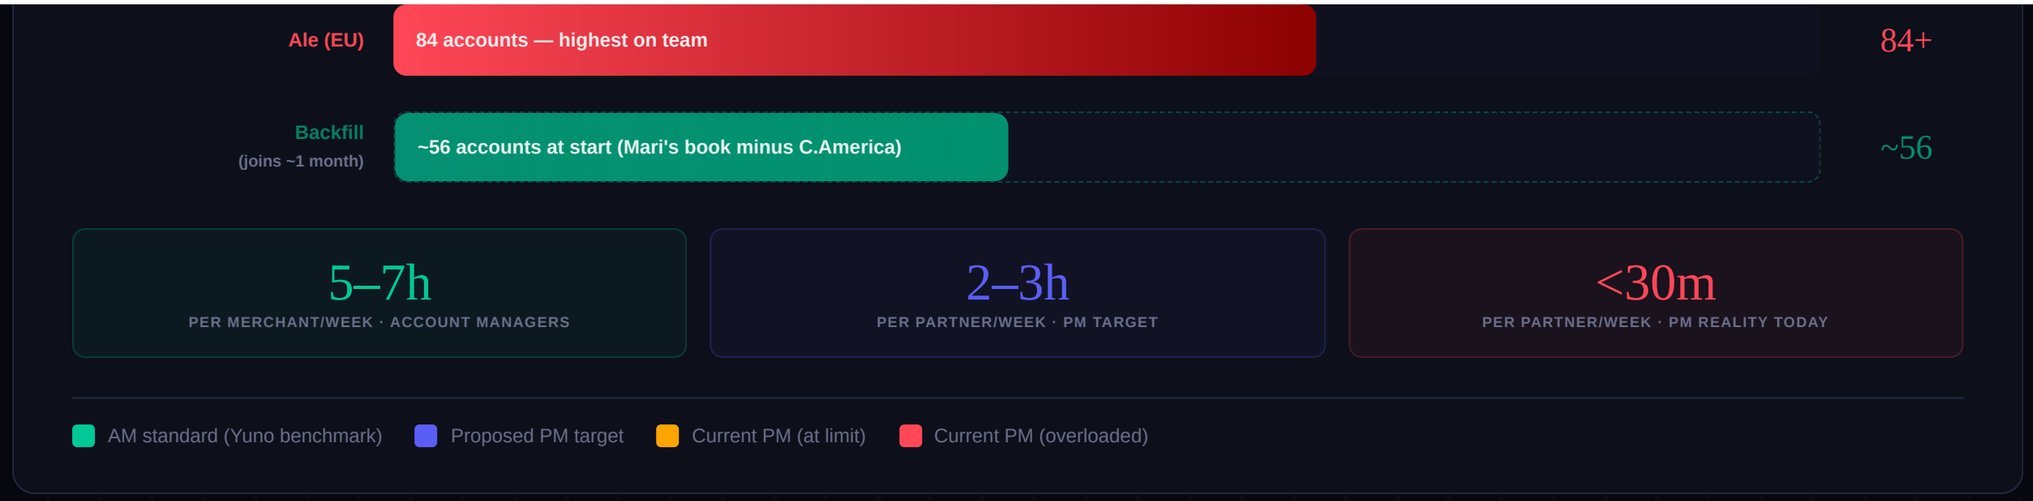
03 — THE GAP IN ONE CHART

Partners are Yuno's multiplier. We manage them like a footnote.

A single tier-1 PSP partner unlocks Yuno access to thousands of merchants across their network. The value-per-partner far exceeds the value-per-merchant. Yet the investment is a fraction.

ACCOUNTS PER PERSON — REAL YUNO DATA VS YUNO'S OWN AM BENCHMARK





04 — WHAT BREAKS WHEN PARTNERS ARE STRETCHED THIN

Partners aren't just accounts. They're the infrastructure behind every merchant.

When a PM carries 80 accounts, they can't manage — they can only react. Here's what that costs Yuno.

🔌

Integration Delays Hit Merchants

A stalled partner integration blocks every merchant trying to access that payment method or market. A PM with 80 accounts can't proactively unblock this — it only gets escalated when a merchant is already angry.

Every partner delay = merchants leaving Yuno for a competitor with better local coverage

📉

Growth Signals Go Unread

Partners signal new market readiness, new APMs, and volume potential constantly. At 80 accounts, these signals sit unread. With Franklin gone and APAC unmanaged, 94 partners have no one watching their signals at all. New APAC partnerships can't even be opened without a Head of APAC to own them.

94 APAC accounts currently have no active owner or review cadence

🤝

Strategic Partners Deprioritise Yuno

PSPs and acquirers work with many orchestrators. Checkout, Stripe, dLocal, Mastercard — these partners have dedicated partner teams on their side. If Yuno's PM is unreachable, they give preferential terms to the competitor who shows up.

Yuno has 19 strategic accounts under Ale alone — each needing exec-level attention she can't give at 84 total

🌍

APAC + NA Effectively Uncovered

Franklin's 60 APAC accounts plus 34 unassigned = 94 accounts with no owner. These span Japan, India, Indonesia, Australia, SEA, Korea, Taiwan — the world's largest payments market by volume — with zero active PM, zero review cadence, zero growth plan.

APAC = ~94 accounts with no owner. Every month without a Head of APAC is compounding partner equity loss.

🔥

Redistribution Makes Things Worse

With the backfill joining in ~1 month, Mari's main portfolio is covered. But Tali and Jo each absorb ~11 Central America accounts now. Ale at 84 and Tali at ~91 are both well above any sustainable threshold — before the backfill even starts working through Mari's book.

💸

Hidden Revenue Dilution

Missed expansion, unfavourable routing, churn of tier-1 partners — these don't show as a line item. They show as "why is TPV growth slowing?" The 34 unassigned accounts alone represent unknown revenue risk with no one looking at them.

Replacing one churned strategic partner costs 5–10× the annual cost of the PM hire that could have retained them

Even with the backfill in place: 4 of 5 active PMs remain at 5–10× the AM standard load

05 — THE HIRING PLAN · SCALE LIKE WE SCALE FOR MERCHANTS

If AMs get a hire at 6–9 merchants, PMs should get one at 15–20 partners.

We're not asking for parity — partners carry higher complexity per account than merchants. We're asking for the same logic: invest in the relationship layer, and it compounds.

NOW — URGENT

1

Critical hire to unblock APAC immediately

- **Mari backfill** — joining in ~1 month, inherits Mari's full book (NA, Global, Strategic). C.America already transferred to Tali & Jo.
- **Head of APAC** — most urgent open role. Inherits Franklin's 60 + 34 unassigned (~94 accounts). APAC is a black hole right now with no owner.
- Once both in place, the 34 unassigned accounts get assigned and Tali / Jo / Ale / Fran each get breathing room.

With backfill + Head APAC: avg load drops to ~65/PM · Still above target but urgent pressure relieved

6–12 MONTHS

+3–4

Scale to match growth trajectory

- 2× APAC sub-region PMs (SEA, East Asia) — APAC Head will be at capacity fast at 94 accounts
- 1× additional EU PM — Ale at 84+ is the single highest-risk PM on the team
- 1× LATAM expansion PM — Tali at ~91 with C.America transfer is unsustainable
- Formally assign all 34 currently unassigned accounts to named owners

With 6–7 total PMs: avg load ~35 per PM · Approaching manageable depth

12–24 MONTHS — PARITY MODEL

15–20

PMs at the right ratio

- Hire per 15–20 partner accounts — mirror AM logic, applied to partnerships
- Tiered portfolio model: Strategic (8–10 max), Growth (15–20), Standard (self-serve)
- Partner health dashboard: auth rates, CB ratios, integration adoption, NPS per PM
- Mandatory QBR cadence for strategic + growth tiers

Target: 15–20 accounts/PM · Deep, proactive, compounding partnership value

THE CASE — IN NUMBERS

10–13×

THE OVERLOAD RATIO

PMs carry 10–13× the load of AMs by Yuno's own hiring standard. Even with the Mari backfill joining in 1 month, all 4 existing PMs

94

APAC ACCOUNTS WITH ZERO OWNER TODAY

Franklin's 60 + 34 unassigned. These accounts — spanning Japan, India, Australia, SEA, Korea — have no active PM, no review

2

HIRES TO STABILISE THE TEAM

Mari backfill (joining in ~1 month, covering NA + Global) + Head of APAC (Franklin's 60 + 34 unassigned = 94 accounts). These 2 hires

remain at 5–10× the AM standard. This is not a scalable operating model.

cadence, and no growth plan. Every day without a Head of APAC is a compounding risk.

close the most critical structural gaps and give the active team room to breathe.

"We hire an AM for every 6–9 merchants. Our partners reach thousands of merchants each. The math for investing in partnerships writes itself."
